MICROPOROUS MEMBRANE MATERIALS

Diesel Fuel Filtration

晶元®

膜過濾器系統

New Generation Membrane Separation Refined Filtration System

型号 Model: JY-T100

工作压力 Working Pressure: 0.2~0.3Mpa

流量 Flow Rate(According to oil quality): 80L/min(max)

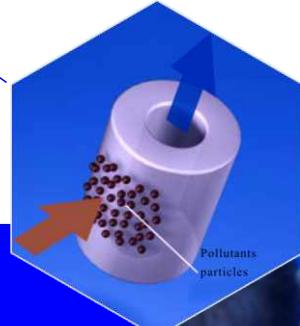

滤芯精度 Precision: 5~25μm

滤芯材质 Filtering material: Polymer membrane materials

接口尺寸 Flange Mouth: DN50

适用油品 Apply to oil: Diesel fuel, Aviation fuel

尺寸 Measurement: 1490×490×900mm

JY-T100

柴油净化过滤器

Diesel Fuel Filtration

Filter Technology Solutions Partner

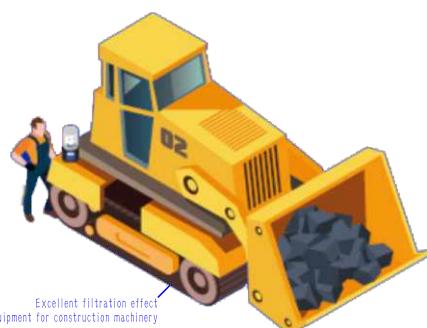

主要特点/FEATURES

Can effectively intercept and separate impurities, colloid, water and micro particles in oil. The oil becomes clear and transparent after filtration, and the cleanliness level is greatly improved, effectively extending the service life of mechanical equipment. Comply with the national environmental protection regulations, no pollution consumables, no diesel consumption, no need to clear sand and slag. The polymer membrane filter elements can be used repeatedly after blowing, save the cost of consumables. The equipment operation is simple, and there is a professional after-sales team tracking service, let you have no worries. Be suitable for gas station/construction machinery/and other places need oil filtration.

Jingyuan has a one-stop product development and production system from the development of membrane materials to finished products. To provide users with satisfactory dedicated filters and their systems.

MICROPOROUS MEMBRANE MATERIALS (膜型号及規格)

Membrane filter order models	Nominal Pore Size
J22-330 L/H	0.5~15 μm
J22-400 L/H	0.5~15 μm
J30-970 L/H	0.5~25 μm
J30-980 L/H	0.5~25 μm

The must choose filtration equipment for construction machinery
